

90-net uninterruptible power supply

Overview

It provides uninterrupted power to connected loads in the event of a power outage, ensuring continuous operation of your equipment. 90-NET is equipped with a dedicated user input, which is default configured to execute the EPO function. The 90-NET 250 to 800 kVA UPS is a reliable and efficient power supply solution for critical applications. Aspects of Chloride 90-NET's premium class performance are: Single-cabinet industrialization up to 500 kVA and dual cabinet for 600 and 800 kVA, saving floor space and allowing for. This specification describes a continuous duty three-phase, solid state, insulated gate bipolar transistor (IGBT) uninterruptible power supply (UPS) system. The UPS shall automatically provide continuity of electrical power, within defined limits and without interruption, upon failure or. What is an industrial uninterruptible power supply (UPS) system?

In the case of mains power failure, they provide an uninterrupted power supply from battery and allow for the safe evacuation of people or shutdown of operational processes.
