

Budapest mobile power storage vehicle customization

Overview

Specializing in custom energy storage solutions for commercial vehicles, we bridge the gap between automotive engineering and smart grid technology. Whether you're upgrading municipal buses or creating mobile charging stations, our Budapest-based team delivers turnkey. That's the reality Budapest is moving toward with specialized power storage vehicle solutions. This technology serves three key audiences: Vehicle-to-grid (V2G) integration has grown 42% in Hungarian commercial fleets since 2022 (see table below). Budapest's unique position as a transportation. Based on MOL Group's decades of experience in mobility and in line with MOL GROUP's "2030+ Shape Tomorrow" strategy, we develop and maintain charging infrastructure for Electric Vehicles (BEV or PHEV) across Central Eastern Europe. This milestone marks a significant step in our European expansion, reinforcing our commitment to innovation, sustainability, and energy efficiency. Project. SUNNIC Mobile Storage- EV Charging Container: Employs 2 MWh energy storage + 400 kW ultra-fast charging to address power-deficient environments in highway service areas and logistics parks. Enables zero-carbon energy replenishment and infrastructure upgrades for industrial zones worldwide.
