

Can I buy cargo insurance for photovoltaic panels

Overview

A: Yes—most carriers offer all-risk insurance for an additional 1-2% of the cargo value. Q: Are there size limits for solar panels on planes?

A: Standard panels (2m x 1m) fit in most cargo holds, but oversized modules may require charter flights. Verify that marine cargo insurance policies specifically cover photovoltaic modules with appropriate valuations reflecting current market prices, not just invoice costs. Solar panels face unique shipping vulnerabilities—micro-cracks from vibration, moisture ingress compromising electrical. When shipping photovoltaic (PV) modules, insurance isn't just a checkbox—it's a critical safeguard against financial losses that can arise from unpredictable scenarios. Whether you're moving panels domestically or internationally, understanding the nuances of coverage ensures you're protected when. Inland Marine Insurance for Solar Equipment is increasingly vital as the solar energy industry expands. Inland Marine insurance for renewable energy helps protect materials, tools and equipment while in transit, at temporary locations or during installation for midsize and large businesses.
