

El salvador solar industry

Overview

Solar technology has become the defining feature of El Salvador's electricity generation, with 97.02 percent of the country's plants now running on photovoltaic systems, according to the General Superintendency of Electricity and Telecommunications (Siget). Gain comprehensive insights into the statistics and metrics surrounding the solar production industry in El Salvador.

Sunshine Duration
The average Sunshine hours in different regions of El Salvador is 3022 hours per year. By the end of 2024, El Salvador counted. The import shipments of solar power products in El Salvador continued to show strong growth in 2024, with top exporting countries including China, USA, Germany, Vietnam, and Mexico. The high Herfindahl-Hirschman Index (HHI) indicates a concentrated market, with a notable compound annual growth rate. As countries around the world shift towards renewable energy sources, El Salvador is gradually increasing its solar and wind energy capacity. While the progress is commendable, particularly in solar, there is still ample room for further development and investment in the country.
