

How to use the solar inverter data stick

Overview

A Solis 5K inverter is used here as an example. Step 1: Remove the plastic protective cap from the inverter COM port. Step 3: Match the joint, and then plug the data logger. Solis is one of the world's largest and most experienced manufacturers of solar inverters supplying products globally for multinational utility companies, commercial & industrial rooftop projects, and residential solar systems. more This video provides a step-by-step guide to connect and configure the Solis WiFi Stick Datalogger S3, used for inverter monitoring and. Connect the data logger to the corresponding USB port of the inverter. He begins by highlighting the key differences between the two devices, such as the presence of LEDs and a reset button on the new model. The tutorial. nt may be updated due to product upgrades or other factors. The statements and n any form without prior written p b t S lect the stick.
